# Nota bene

Nowadays articles are collected in documents like `mk.pdf`, `hybrid.pdf`, `about.pdf`, `still.pdf`, `musings.pdf`. We also put more in small dedicated manuals. But ... we keep this document for historic purposes. The styles are in the distribution.

Bounding Boxes

Hans Hagen

This technote discusses some of the problems that may show up when using third party graphics. When placing graphics with TEX, a proper (or at least well defined) boundingbox is a prerequisite.

Equal Font Metrics

Hans Hagen

TEX has a reputation that even after years you can still get the same output from the same source. Unfortunately this is not true: macro packages change, hyphenation patterns are updated, and font metrics are not as constant as the font design itself. This technote demonstrates that it really matters what metrics you choose.
